

SURAJ S

Senior Network & Security Engineer

Dubai, UAE | +971 52 846 7587 | suraj.gowrisankaram@gmail.com

PROFESSIONAL SUMMARY

Senior Network & Security Engineer with 12+ years of experience designing, deploying, securing and troubleshooting enterprise LAN/WAN/WLAN and SD-WAN environments. Strong hands-on experience with Fortinet, Cisco/Meraki, Huawei, enterprise wireless, VPN, IPS/UTM, routing and switching, network segmentation, Azure/AWS networking, VoIP, monitoring and high-availability infrastructure. Proven track record leading multi-site operations, infrastructure migrations, security improvements, vendor escalations and L2/L3 incident resolution across distributed enterprise environments.

CORE COMPETENCIES

Network Infrastructure	Network Security	Cloud & Wireless	Operations & Projects
LAN/WAN/WLAN, SD-WAN, VLANs, STP/RSTP/MST, EtherChannel, HSRP/VRRP, L2/L3 troubleshooting, OSPF, BGP, routing & switching	FortiGate, Sophos, SonicWall, Sangfor, MikroTik, VPN, NAT, IPS, UTM, security policies, segmentation, AAA/RADIUS, vulnerability remediation	Azure, AWS, GCP, VNets/VPCs, ExpressRoute, VPN Gateway, Azure Firewall, Application Gateway, NSG/ASG, Huawei/UniFi/Meraki wireless, captive portals	PRTG, Zabbix, monitoring, RCA, change/incident support, firmware lifecycle, HA/DR, vendor/TAC coordination, documentation, capacity planning, VoIP

PROFESSIONAL EXPERIENCE

Senior Network Engineer | Feb 2024 – Present

Kleindienst Group | Dubai, UAE

- Lead group-level IT operations across multiple business units and remote locations, overseeing enterprise network availability, security and service delivery.
- Design, deploy and manage secure network architectures using Fortinet and Cisco Meraki; implement firewall policies, VPNs, SD-WAN, NAT and traffic-shaping controls.
- Administer multi-vendor switching across Ubiquiti UniFi, Huawei and Cisco Meraki, including VLAN segmentation, trunking, inter-site connectivity and L2/L3 troubleshooting.
- Manage enterprise wireless using UniFi, Huawei and Cisco Meraki controllers/access points, including authentication and centralized RADIUS services.
- Oversee high-availability microwave backhaul using Cambium and Siklu, supporting resilient connectivity between mainland and remote island locations.
- Manage VoIP infrastructure using Avaya, Cisco and Grandstream platforms, including IVR, SIP trunks, routing and business-center telephony.
- Implement network segmentation for multi-tenant business centers and enforce secure isolation while maintaining required Internet and application access.
- Maintain HA/DR for critical infrastructure; conduct firmware upgrades, vulnerability patching, configuration backup and lifecycle activities.
- Monitor network health with PRTG and Zabbix; perform packet/log analysis, RCA, incident response and proactive optimization.
- Support Azure, AWS and GCP connectivity including ExpressRoute, VPN Gateways and virtual networking; coordinate vendors, ISPs and service providers for escalations and projects.
- Produce monthly network/security reports and support internal audits, security assessments, change activities and operational documentation.

IT Specialist | Mar 2022 – Feb 2024

Cloud Solutions | Dubai, UAE

- Designed and implemented enterprise network and security solutions for clients across multiple industries as part of a system integrator environment.
- Configured and managed FortiGate, Sophos XG/SG, SonicWall, Sangfor and MikroTik firewalls, including policy audits, VPNs, NAT, IPS, web/application controls and security hardening.
- Delivered Azure infrastructure for 100+ clients covering IaaS/PaaS, VNets, NSGs, Application Gateway, Azure Firewall and hybrid connectivity.
- Designed Azure Site Recovery/GRS-based DR solutions and migrated on-premises servers, applications, file shares and AD DS using Azure Migrate and hybrid identity technologies.
- Managed Azure VMs, AVD, Azure Files, Blob Storage, Backup, Monitor and Log Analytics; implemented RBAC, PIM and Conditional Access controls.

- Managed AWS and Azure services including virtual machines, security groups, backups and availability zones; supported VMware vSphere/ESXi and NAS environments.
- Provided 24/7 incident support for a US-based financial-services client, including patching, ITSM, RCA, proactive maintenance and security troubleshooting.
- Managed patch and update compliance through Automox and maintained detailed infrastructure/security documentation.

IT Network Engineer | Jun 2021 – Feb 2022

Soffit Infrastructure (P) Ltd | Ernakulam, India

- Delivered remote infrastructure management, network/security support and monitoring using PRTG across distributed client environments.
- Administered firewalls, switching, wireless, VPNs, routing, storage and endpoint protection; performed packet analysis and root-cause troubleshooting.
- Supported backup/DR operations, infrastructure maintenance, configuration recovery and ITSM-based incident resolution.
- Performed proactive health checks, documentation and security policy reviews to improve uptime and resilience.

Associate Engineer | Mar 2018 – Jun 2021

Wibon Networks (P) Ltd. | Ernakulam, India

- Implemented wired/wireless and security solutions for hospitality, healthcare, education and retail customers, including Cisco, Aruba, UniFi, Fortinet, Sophos, Ruckus, Ruijie, Cambium and MikroTik.
- Configured Layer 2/3 switching, VLANs, firewall policies, PoE, guest access, captive portals, AAA/RADIUS/LDAP and multi-vendor wireless.
- Worked with OSPF, BGP and static routing; managed SD-WAN and site-to-site/IPsec/SSL VPN connectivity.
- Supported MPLS deployments for Airtel using Huawei switches/routers, including QoS and service availability support.
- Acted as a technical point of contact for project delivery, including design, BOQ, vendor coordination, deployment, configuration and handover documentation.

Network Engineer | Mar 2016 – Jan 2018

Kaizen Enterprises | Ahmedabad, India

- Delivered end-to-end network and IT infrastructure projects for 100+ hospitality, healthcare, retail and education clients.
- Implemented Cisco, Aruba, UniFi, Fortinet, Sophos, TP-Link Omada, Ruijie, Cambium, Ruckus and MikroTik solutions including VLANs, firewall policies, guest access and wireless.
- Managed project documentation, IP plans, network schematics, vendor coordination and post-installation support.

IT Administrator | Jul 2014 – Jan 2016

Padmini Steels | Mumbai, India

- Supported LAN/WAN connectivity, switches, routers, wireless, Active Directory, endpoint security, email, user support and IT asset management.
- Assisted with VLANs, port security, firewall rules, network monitoring, cabling, backups and vendor coordination.

Technical Support Engineer | Jan 2014 – Jul 2014

SERCO Global Services | Mumbai, India

- Supported Etisalat UAE customers for TV and Internet services through remote troubleshooting, ticket management and escalation to field engineers.
- Worked in rotational shifts and supported international customers through voice and chat.

EDUCATION & CERTIFICATIONS

B.Tech – Electronics & Communication Engineering | Techno Global University | 2013

- Microsoft Certified: Azure Administrator (AZ-104), 2022
- Designing Microsoft Azure Infrastructure Solutions (AZ-305), 2022
- AWS Certified Solutions Architect – Associate (SAA), 2021
- Cisco Certified Network Associate (CCNA), 2019
- Sophos Certified Security Engineer, 2018
- Fortinet NSE – Fortinet Academy (in progress/current in source CV)

ADDITIONAL INFORMATION

- Languages: Malayalam (Native), English (Advanced), Hindi (Advanced), Tamil (Conversational).
- Open to Abu Dhabi-based enterprise network/security roles and critical infrastructure environments.
- Professional strengths: advanced troubleshooting, stakeholder communication, vendor coordination, documentation, mentoring and working under pressure during critical incidents.
